Hydrobiologia

The International Journal of Aquatic Sciences

Volume 501, 1 July 2003

Preface vii–viii

Re-assessment of Wundsch's (1940) 'H_2 S-*Oscillatoria*-Lake' type using the eutrophic Lake Scharmützel (Brandenburg, NE Germany) as an example
Andreas Kleeberg 1–5

Contribution to the knowledge of Thai microfauna diversity: notes on rare peat swamp Rotifera, with the description of a new *Lecane* Nitzsch, 1872
S. Chittapun, P. Pholpunthin, H. Segers 7–12

Spatial and seasonal variability of the macro-invertebrate community of a rocky coast in Mallorca (Balearic Islands): implications for bioerosion
M. Palmer, J. J. Fornós, P. Balaguer, Ll. Gómez-Pujol, G. X. Pons, G. Villanueva 13–21

Biomass, protein- and carbohydrate-composition of phytoplankton in Varna Bay, Black Sea
Snejana Moncheva, Shela Gorinstein, Galina Shtereva, Fernando Toledo, Patricia Arancibia-Avila, Ivan Goshev, Simon Trakhtenberg 23–28

Denitrification in the periphyton associated with plant shoots and in the sediment of a wetland system supplied with sewage treatment plant effluent
Sylvia Toet, Lucy H. F. A. Huibers, Richard S. P. Van Logtestijn, Jos T. A. Verhoeven 29–44

Responses of the planktonic diatom *Asterionella formosa* Hassall to abiotic environmental factors in a reservoir complex (south-eastern France)
C. Bertrand, S. Fayolle, E. Franquet, A. Cazaubon 45–58

Ichthyoplankton distribution off the Peninsula de Mejillones, Chile (23° S, 71° W), under variable hydrographic conditions during the austral summer and winter of the 1997 El Niño
Laura Rodríguez-Graña, Leonardo R. Castro 59–73

Interactions among epilimnetic phosphorus, phytoplankton biomass and bacterioplankton metabolism in lakes of varying submerged macrophyte cover
Neil Rooney, Jacob Kalff 75–81

Sublethal predation on *Stylaria lacustris*: a study of regenerative capabilities
Anita Kaliszewicz 83–92

Diatom viability in insect fecal material: comparison between two species, *Achnanthidium lanceolatum* and *Synedra ulna*
Christopher G. Peterson, Tracy L. Jones 93–99

Fecal pellet production between molts in a cyclopoid copepod: patterns, individual variability and implications for growth and development
Wataru Makino, Syuhei Ban 101–107

Allelopathic activity of *Chara aspera*
Johanna Berger, Michael Schagerl 109–115

Identification of linear and threshold responses in streams along a gradient of urbanization in Anchorage, Alaska
R. T. Ourso, S. A. Frenzel 117–131

SEM morphological observations on *Artemiopsis stefanssoni* Johansen, 1921 (Crustacea, Anostraca)
Graziella Mura 133–137

Release of planula larvae, settlement and development of *Siderastrea stellata* Verrill, 1868 (Anthozoa, Scleractinia)
Elizabeth G. Neves, Fábio L. da Silveira 139–147

Field biology of *Halimeda tuna* (Bryopsidales, Chlorophyta) across a depth gradient: comparative growth, survivorship, recruitment, and reproduction
Peter S. Vroom, Celia M. Smith, James A. Coyer, Linda J. Walters, Cynthia L. Hunter, Kevin S. Beach, Jennifer E. Smith 149–166

Diversity of aquatic hyphomycetes in the aquatic ecosystems of the Western Ghats of India
M. Rajashekhar, K. M. Kaveriappa 167–177

Freshwater bryozoans (Bryozoa) of Norway IV: Distribution and ecology of four species of *Plumatella* with notes on *Hyalinella punctata*
Karen Anna Økland, Jan Økland, Gaby Geimer, Jos. A. Massard 179–198

Biomonitoring of trace metal contamination in mangrove-lined Brazilian coastal systems using the oyster *Crassostrea rhizophorae*: comparative study of regions affected by oil, salt pond and shrimp farming activities
C. A. R. Silva, P. S. Rainbow, B. D. Smith 199–206

Spatial and seasonal variation of macroalgal biomass in Laguna Ojo de Liebre, Baja California Sur, Mexico
R. N. Aguila Ramírez, M. Casas Valdez, S. Ortega García, R. A. Núñez López, M. B. Cruz Ayala 207–214

Short note
Exposure to chemicals exuded by fish reduces the filtration and ingestion rates of *Ceriodaphnia* cf. *dubia*
Rebecca M. Rose, Michael St.J. Warne, Richard P. Lim 215–217

Erratum
Sinking properties of some phytoplankton shapes and the relation of form resistance to morphological diversity of plankton – an experimental study
Judith Padisák, Éva Soróczki-Pintér, Zsuzsanna Rezner 219
